GEOELEC
Prospective for Geothermal Electricity in Europe

Regional Workshop Benelux-Denmark-Sweden-Norway

Burkhard SANNER

European Geothermal Energy Council

Utrecht, 24/01/2012

GEOELEC

Regional compilation of prospective areas and resource assessment

Geoelec Geothermal resource assessment protocol

Data compilation

Critical review of bibliographic compilation from:

- Geological surveys
- Oil & Gas company public reports
- Direct contacts with underground ‘explorators’
- 7 regional workshops to complete data compilation

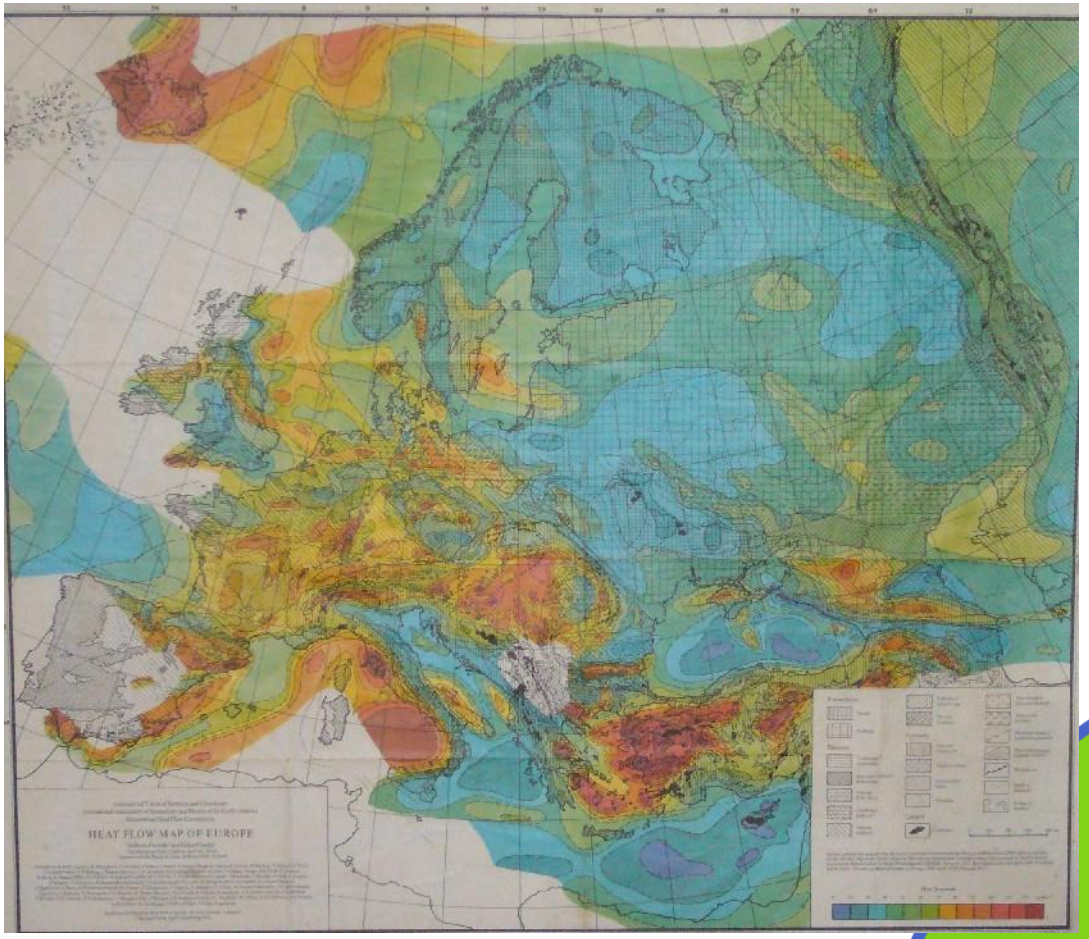
Early geothermal data compilations

CERMAK, V. & RYBACH, L. (eds.) (1979): Terrestrial Heat Flow in Europe

Book with different papers from a Workshop

A map of heat flow density was included in that book

Similar book:
CERMAK, V. & HÄNEL, R. (eds.) (1980): Geothermics and Geothermal Energy, Symposium EGS/ESC Budapest



(Map by Cermak & Hurtig, 1979)

Early geothermal data compilations

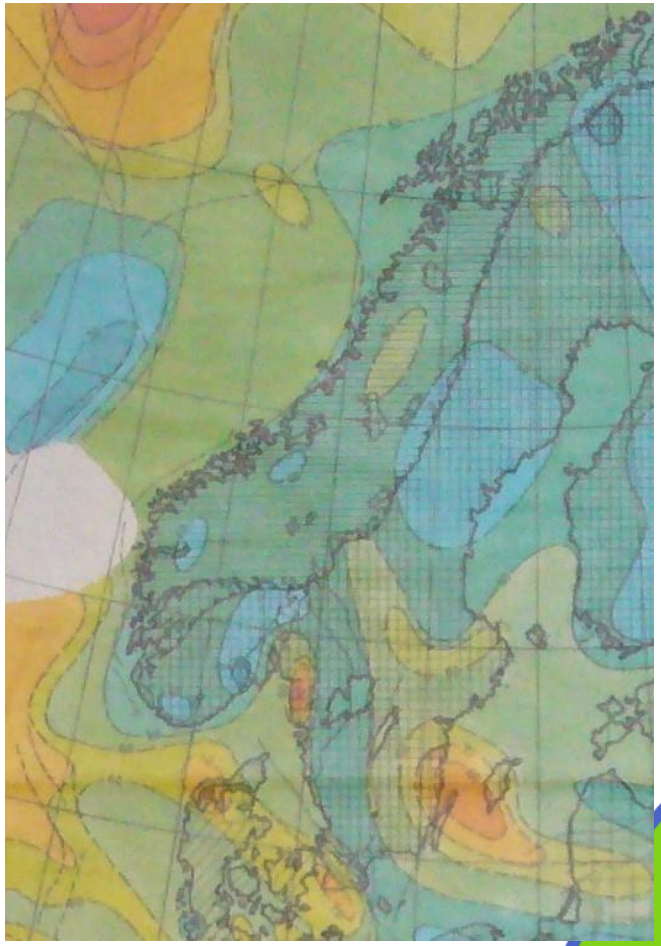
CERMAK, V. & RYBACH, L. (eds.) (1979): Terrestrial Heat Flow in Europe

Book with different papers from a Workshop

A map of heat flow density was included in that book

Enlargement Benelux

Enlargement Scandinavia



(Map by Cermak & Hurtig, 1979)

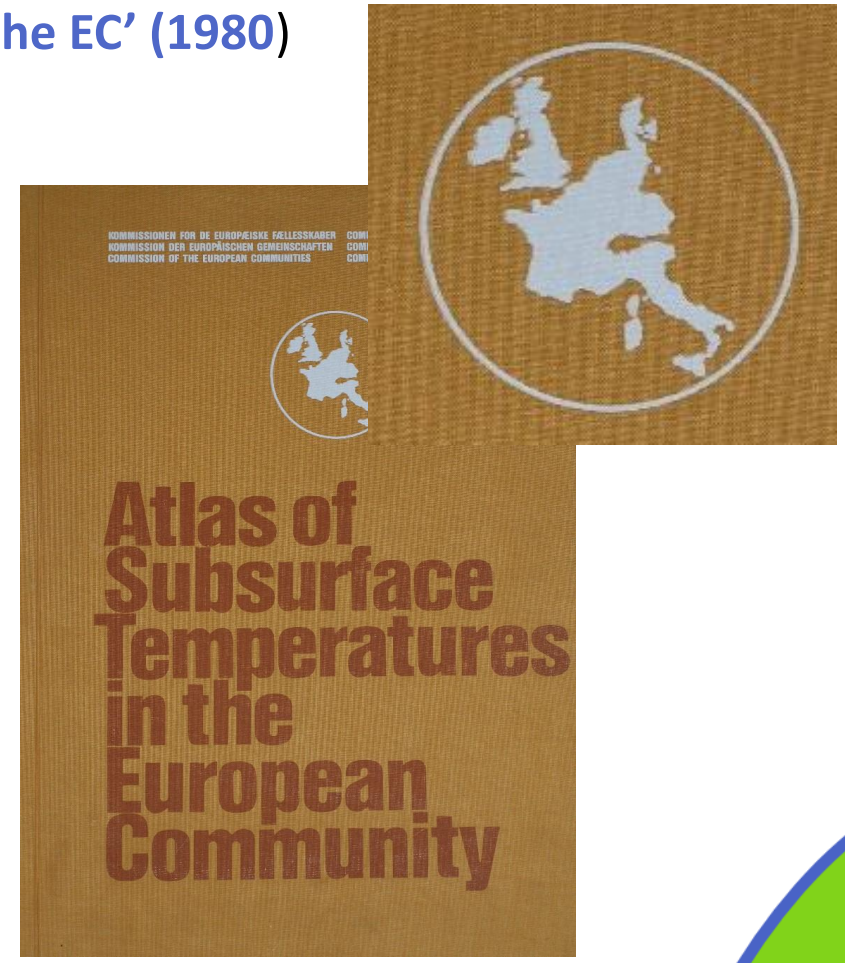
GEO-ELEC

Early geothermal data compilations

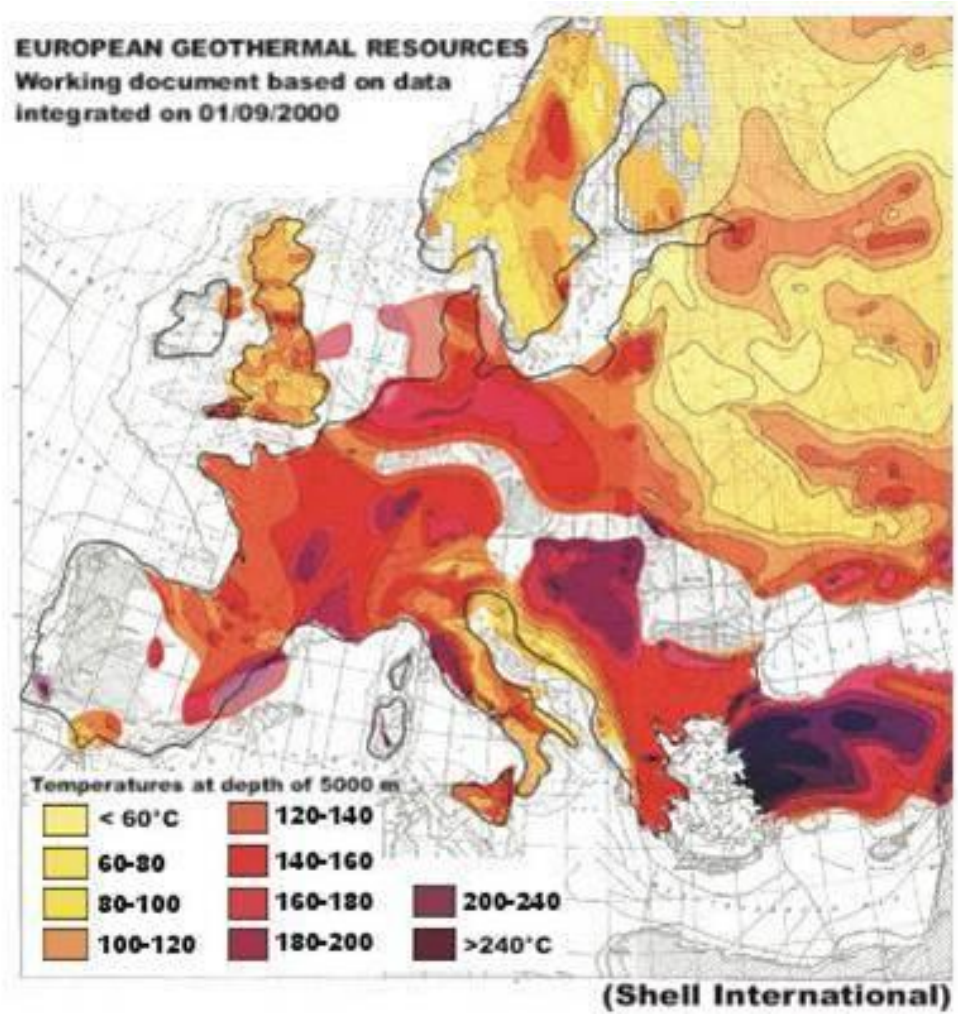
EC 'Atlas of Subsurface Temperatures in the EC' (1980)

Coordinated by BGR, Hannover
(Ralph Hänel)

Only heat flow and temperatures
at depths between 500 and 5000,
for countries and regions
(e.g. Soultz-Landau)



SHELL Map (2000)



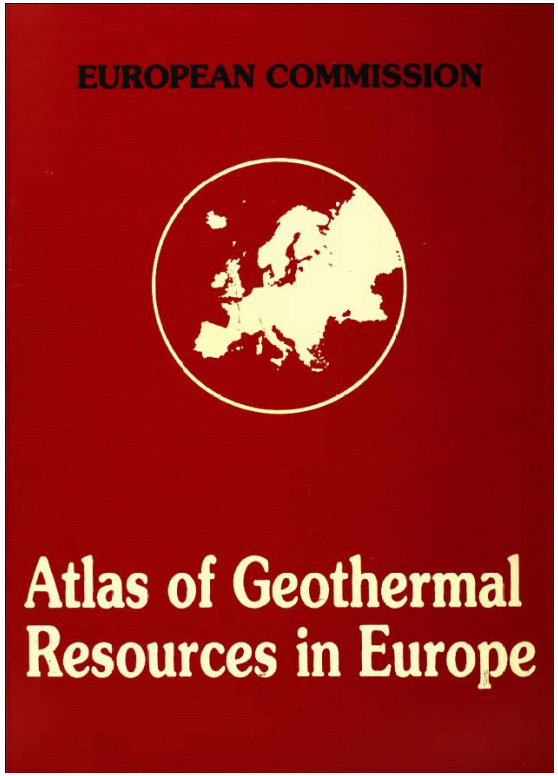
GEOELEC

Regional compilation of prospective areas and resource assessment

EC 'Atlas of geothermal resources in Europe' (2002)

Coordinated by BGR, Hannover
(Suzanne Hurter)

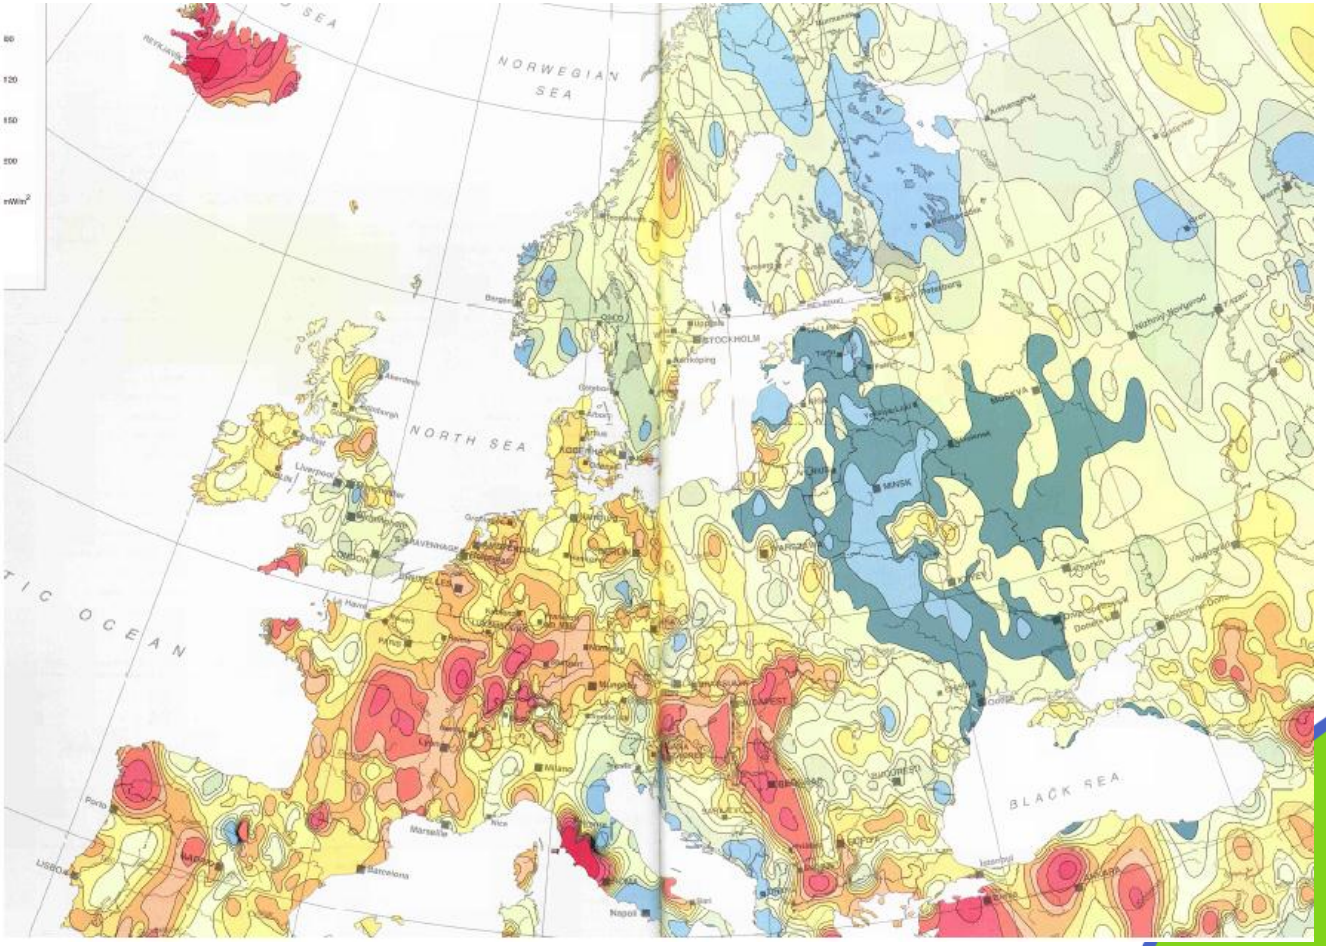
Overview:
Heat Flow
Temperature at 1 Km and 2 Km depth
European Geothermal resources



Regional compilation of prospective areas and resource assessment

EC 'Atlas of geothermal resources in Europe' (2002)

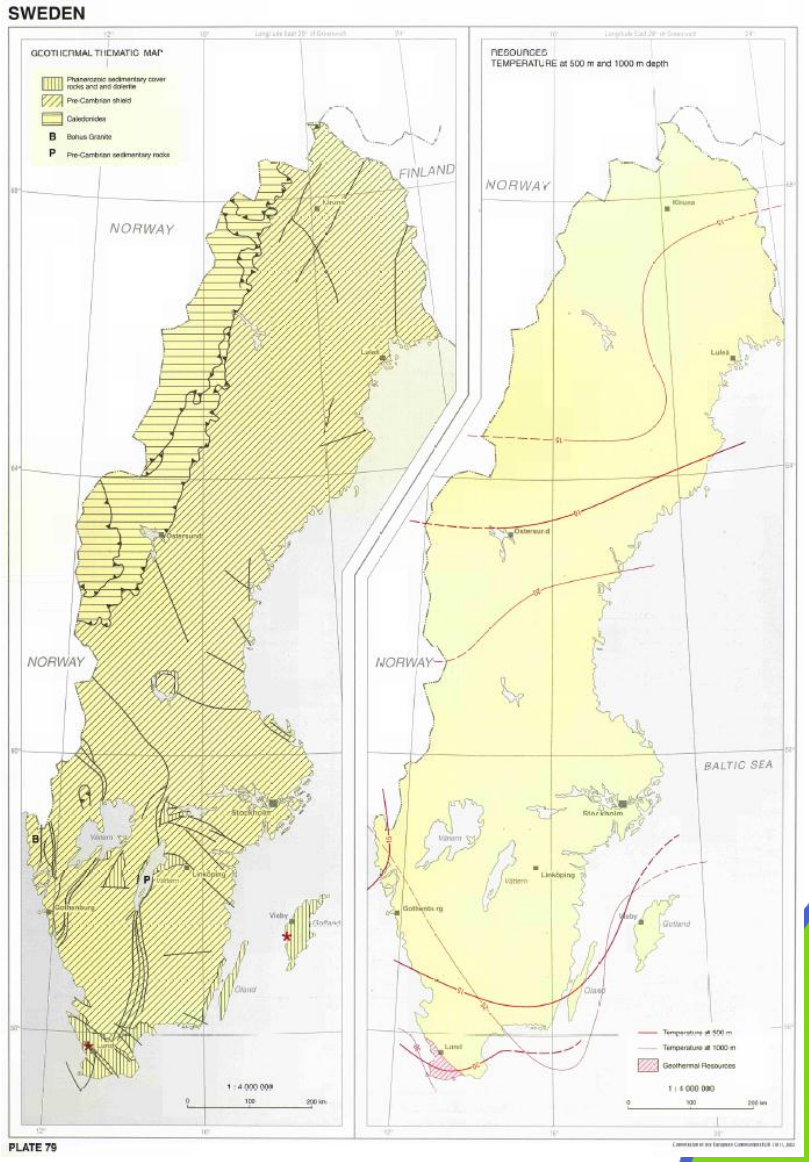
Heat flow density



Regional compilation of prospective areas and resource assessment

EC ‘Atlas of geothermal resources in Europe’ (2002)

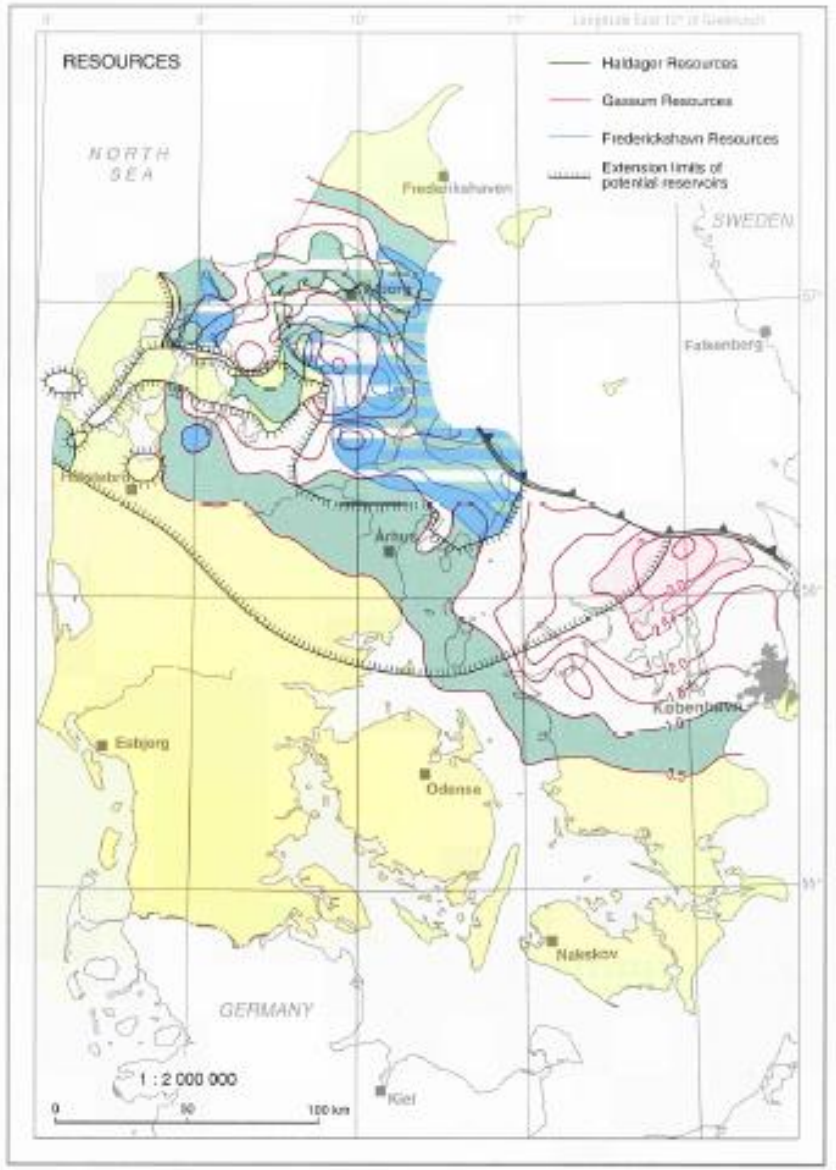
Overview of potential in Sweden



Regional compilation of prospective areas and resource assessment

EC 'Atlas of geothermal resources in Europe' (2002)

Overview of potential in Denmark



Regional compilation of prospective areas and resource assessment

EC 'Atlas of geothermal resources in Europe' (2002)

Overview of potential in the Netherlands

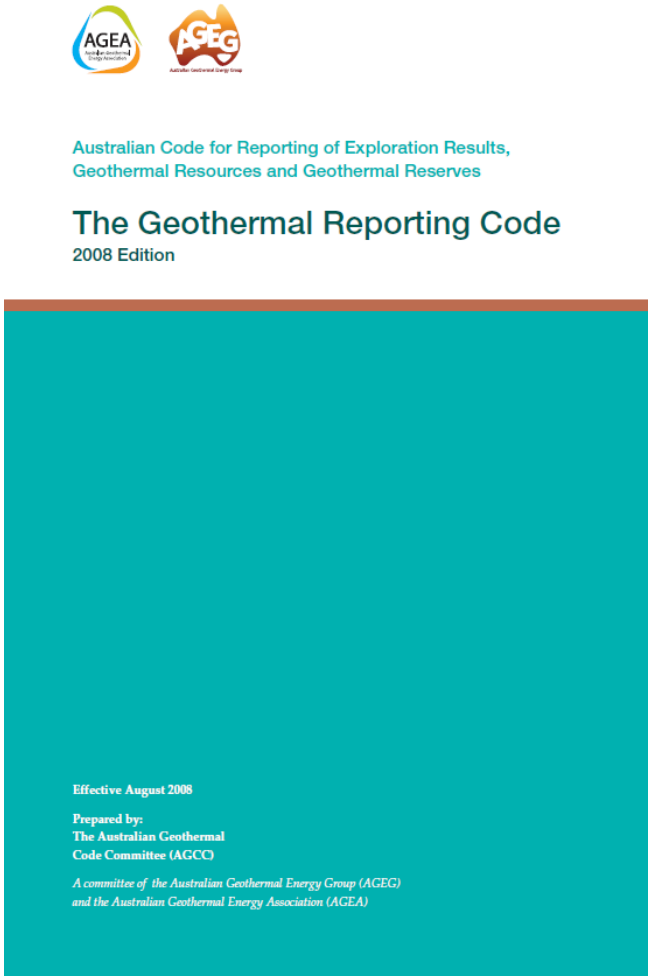
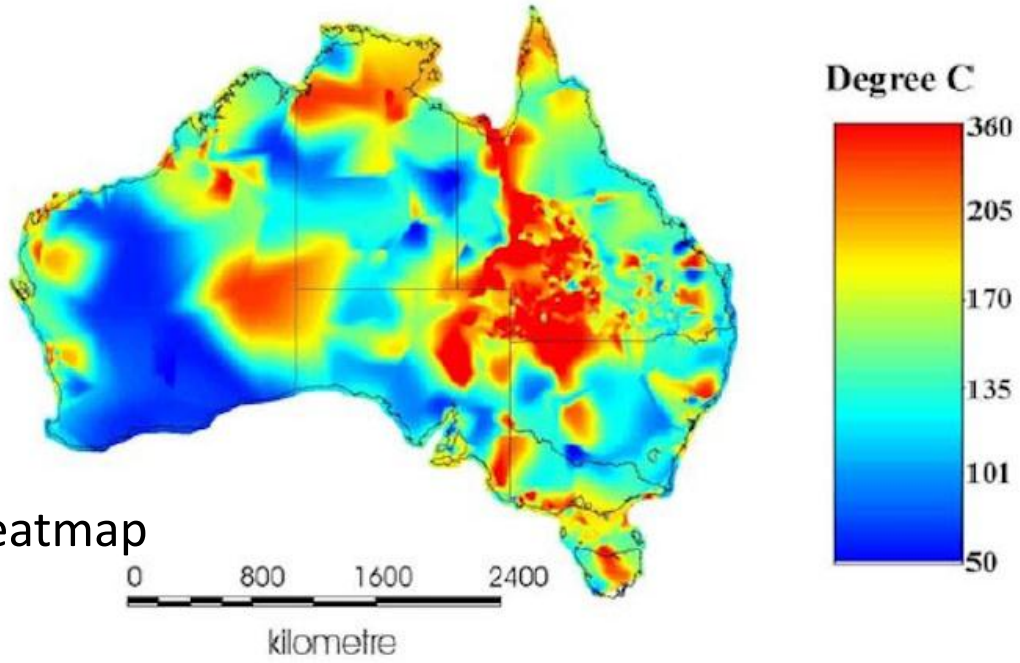
Australia

The Geothermal reporting code, 2008, AGEA-AGEG



Australia

November 07, 2011: Exciting project looks at new way of characterizing resources in Australia



Australia_geothermal_heatmap

The Australian geothermal energy industry goes new ways with enlisting machine learning experts to identify and characterise resources by combining industry data and data of Geoscience Australia

GEOELEC

Regional compilation of prospective areas and resource assessment

Geoelec Geothermal resource assessment protocol

Expected results:

- Compilation of geological and geophysical data inside Geological surveys, accessible to interested developers as open and easily as possible
- Basic data for European EGS resource assessment
- European Geothermal Reporting Code (discussion already started within TP Geoelec)
